Options	<ul style="list-style-type: none"><li>• Cold &amp; ambient</li><li>• Hot &amp; cold</li></ul>
Weight	<b>Freestanding: 28kg</b> <b>Tabletop: 23kg</b>

## Installation Requirements

To ensure that the Waterlogic machine can be installed quickly and smoothly in your proposed location, each machine will require a 13A (240V AC) switched socket which should not be more than one metre from the machine.

Each plumbed water machine needs to be supplied with water from a rising main. Machines cannot be connected to a storage tank water supply. The pipe work should ideally be no more than one metre from the machine although our in-house service team are able to install machines in the majority of locations.

Pipe work must be terminated with a 15mm BS1010 stopcock.
